

DEEPIKA GOVINDASWAMY

Java Backend Developer | Spring Boot | Distributed Systems | Microservices

deepikagovindaswamy@gmail.com | UK (Open to Relocation) | +44 7823518785 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Java Developer functionally building production-ready, scalable backend systems. Specialized in designing scalable microservices, event-driven architectures, and secure high-performance APIs using Java, Spring Boot, Docker, and Kubernetes on cloud platforms. Proven ability to deliver end-to-end systems that reduce operational bottlenecks, automate workflows, and enhance system reliability — backed by hands-on experience building enterprise-grade fintech and SaaS solutions.

SKILLS

Languages: Java, Python, Bash, JavaScript, SQL.

Backend and Cloud: Spring Boot, Hibernate/JPA, AWS (EC2, IAM, S3), Docker, Kubernetes, CI/CD pipelines, Apache Kafka.

Architectures and Methodologies: Microservices, Event-Driven Architecture, Distributed Systems, REST APIs, Agile methodologies.

Other Tools and Frameworks: Git, GitHub, GitHub Actions, GitLab, React, Node JS, Fast API, Postman.

EXPERIENCE

Software Development Engineer Intern - Igarashi Motors India Ltd

(July 2022 – August 2022)

- Collaborated in a team of 3 to deliver a Spring Boot-based Incident Management System that lowered service downtime by 30%.
- 20% reduction in time to resolution by implementing severity-based prioritisation and centralised incident logging.
- 25% improved feature delivery speed by actively participating in cross-functional Agile sprints, refining backlogs, and improving sprint planning efficiency.

PROJECTS

REMIX - E-Waste Management Application.

University of Sheffield | February 2025 – April 2025

Java, Spring Boot, Spring Security, Hibernate, MySQL, Vue JS.

- Collaborated in an Agile/Scrum environment to develop the backend of the system using Java, Spring Boot, Spring Security, and Hibernate/JPA to handle authentication, device management, and order workflows, improving system reliability and scalability.
- Integrated **Stripe-based PCI-compliant payments** and automated confirmation emails, reducing manual processing by **60%**.
- Implemented QR-driven traceability workflows, speeding recycler processing by **35%**.
- Delivered fully documented REST APIs with Swagger, **reducing integration effort** by **50%**.

Stock Portfolio Management System with Integrated Risk Analysis.

University of Sheffield | June 2025 – August 2025

Java, Spring Boot, Hibernate, FastAPI, PostgreSQL, Docker, React.

- Architected a **microservices-based fintech system** with real-time portfolio valuation and risk analysis, **reducing response latency** by **30%** through optimised SQL queries (Evaluated using EXPLAIN ANALYSE).
- Integrated Stripe-based PCI-compliant payments, reducing payment processing friction, enabling **100% secure transactions** and robust error handling for resilience.
- Implemented an AI-powered FastAPI service performing clustering, volatility calculation, and diversification insights, improving investor decision-making accuracy by **45%**.
- Containerized the entire system using Docker, enabling single-command deployments and simplified developer onboarding.

EDUCATION

Master of Advanced Computer Science - Distinction

School of Computer Science, The University of Sheffield, UK (2024 –2025)

Bachelor of Engineering, Computer Science and Engineering - Distinction

Sri Venkateswara College of Engineering, India (2020 –2024)
